

Shorthand Order

When using the shorthand for the box model properties such as margin, padding or border the values are input in the following order:

For example:

```
{padding: 2px 4px 6px 10px} would be shortcut for:  
{padding-top:2px;  
padding-right:4px;  
padding-bottom:6px;  
padding-left:10px;}
```

NOTE: The following shortcut {padding: 2px; 4px} would padding-top and padding-bottom:2px AND padding-right and padding-left:4px

Box Model Properties

margin-top
margin-right
margin-bottom
margin-left
margin [shorthand for all properties]
